## EDUCATION

---

### Vanderbilt University

Ph.D. student in Computer Science

Advised by Prof. Catie Chang

Russell G. Hamilton Scholar, Engineering Graduate Fellowship

Nashville, TN, U.S.A

Sept 2022– Present

### Shanghai Jiao Tong University

M.Sc. in Biomedical Engineering, supervised by Prof. Shanbao Tong

Advised by Prof. Shanbao Tong and Prof. Xiaoli Guo

Legend Medical Excellence Scholarship (top 2%)

Shanghai, China

Sept 2019 – Mar 2022

### Xi'an Jiaotong University

B.E. in Biomedical Engineering

National Scholarship (top 0.2%), Outstanding Graduate

Xi'an, China

Sept 2015 – Jun 2019

## RESEARCH EXPERIENCE

---

### Vanderbilt University (Department of Computer Science) – Neurdy Lab

Mentor: Prof. Catie Chang

Nashville, TN, U.S.A

September 2022 – Present

#### Multimodal Learning in Functional Neuroimaging

##### EEG-to-fMRI Translation

- Developed a generalizable deep learning approach to translate low-dimensional neural time series (raw scalp EEG) into corresponding functional MRI activity signals across the brain.
- Designed a novel transformer-based architecture that learns multi-dimensional, multi-scale spectral representations to effectively map EEG to fMRI.
- Achieved state-of-the-art prediction performance across subject-dependent and unseen-subject predictions, as well as zero-shot, whole-scan predictions on data collected from a different site with different EEG and fMRI systems.

##### Brain Decoding – Decoding Natural Images from EEG

- Built spatiotemporal EEG Encoder to learn effective representation of multi-channel EEG signals.
- Implemented a self-supervised contrastive framework that utilizes pretrained CLIP to align EEG representation with the corresponding image representations.

##### EEG-fMRI dynamic correlations

- Summarized and reviewed the existing EEG metrics that were reported to reflect the fMRI fluctuations.
- Used data-driven unsupervised clustering method to find the prominent EEG-fMRI correlation patterns.
- Explored the temporal variation and state dependence of EEG-fMRI dynamic correlations.

### Shanghai Jiao Tong University (Department of Biomedical Engineering)

Mentor: Prof. Shanbao Tong, Prof. Xiaoli Guo

Shanghai, China

September 2019 – March 2022

#### EEG Hyperscanning Study during Mother-child Interaction

- Used dual-EEG system to explore the inter-brain synchrony during mother-child cooperative interactions.
- Designed a strictly controlled protocol, collected and processed 54 dyads of time-aligned EEG data.
- Modeled directed and undirected inter-brain network to unravel the neural mechanisms underlying adult-child interaction behaviors.

### Zhejiang University (Department of Biomedical Engineering & Instrument Science)

Mentor: Prof. Dan Wu

Hangzhou, China

August 2021 – October 2021

#### Fetal Brain Super-Resolution Reconstruction

- Applied model-based deep-learning approach to reconstruct fetal brain MRI images with super-resolution.
- Compared different learning-based super-resolution reconstruction algorithms in fetal imaging.
- Improved reconstruction image quality from conventional optimization by 5dB in PSNR.

### Xi'an Jiaotong University (Department of Biomedical Engineering)

Mentor: Prof. Gang Wang

Xi'an, China

October 2018 – January 2020

#### EEG Microstate Analysis During Anesthesia

- Calculated and identified specific EEG microstates during anesthesia using modified K-means, and modeled microstate-wise connectivity to predict the states of loss of consciousness.

- Developed novel and effective microstate spectral analytical methodology by embedding Hilbert-Huang transform into microstate analysis.
- Generated markers effectively estimated the brain states and outperformed other conventional EEG-based parameters by 5% in accuracy and 10% in sensitivity in SVM.

**Pohang University of Science and Technology (Department of Creative IT Engineering)**

Pohang, South Korea

Open-Lab Summer Internship, Mentor: Prof. Chulhong Kim

July 2018 – August 2018

#### **Photoacoustic imaging**

- Applied ring transducer to Microelectromechanical systems (MEMS) based scanning optical resolution photoacoustic microscopy (OR-PAM) system to achieve high imaging speed and high SNR.
- Conducted examinations and image acquisition through the above system and improved the image quality through post-processing.

## **PUBLICATIONS**

---

### **Journal Articles**

- J1. Lou A, Planche B, Gao Z, Li Y et al., “DaRePlane: Direction-aware Representation for Dynamic Scene”, 2024, Submitted to *IEEE Transactions on Pattern Analysis and Machine Intelligence* (IF=20.8).
- J2. Xu J, Li Y, Su R, Wu S, Wu C, Wang H, Zhu Q, Fang Y, Jiang F, Tong S, Zhang Y, Guo X, “Dynamic inter-brain states during mother-child cooperation and their neural oscillational substrates”, 2024, under review for *IEEE Journal of Biomedical and Health Informatics* (IF=7.7).
- J3. Li Y, Wu S, Xu J, Wang H, Zhu Q, Shi W, Fang Y, Jiang F, Tong S, Zhang Y, Guo X, “Interbrain substrates of role switching during mother-child interaction”, 2024, *Human Brain Mapping* (IF=5.4).
- J4. Shi W, Sun J, Sun C, Li Y, Xu H, Xu X, Zheng T, Zhang Y, Wang G, Wu D, “AFFIRM: Affinity Fusion-based Framework for Iteratively Random Motion correction of multi-slice fetal brain MRI”, *IEEE Transactions on Medical Imaging*, 2023, 42(1): 209-219. (IF=10.6).
- J5. Zhang K, Shi W, Wang C, Li Y, Liu Z, Liu T, Li J, Yan X, Wang Q, Cao Z, Wang G, “Reliability of EEG microstate analysis at different electrode densities during propofol-induced transitions of brain states”, *NeuroImage*, 2021, 231:117861. (IF=7.4).
- J6. Shi W, Yan G, Li Y, Li H, Liu T, Sun C, Wang G, Zhang Y, Zou Y, Wu D, “Fetal brain age estimation and anomaly detection using attention-based deep ensembles with uncertainty”, *NeuroImage*, 2020, 223:117316. (IF=7.4).

- C10. **Li Y**, Wu S, Shi W, Tong S, Zhang Y, Guo X, “Enhanced inter-brain connectivity between children and adults during cooperation: a dual EEG study”, *43<sup>rd</sup> Annual International Conference of the IEEE Engineering in Medicine and Biology Society (EMBC) 2021*: 6289-6292.

## Workshops and Conference Abstracts

- A1. Rogge-Obando K, Wang S, Pourmotabbed H, **Li Y** et al., "Examining switching rates of resting state networks across arousal levels", *Society for Neuroscience annual meeting (SfN)*, 2024, Chicago, U.S.A.
- A2. **Li Y**, Lou A, Xu Z, Wang S, Chang C, “Leveraging periodic activation functions in a deep neural network to predict fMRI signals from EEG”, *Organization for Human Brain Mapping (OHBM) Annual meeting 2024*, Seoul, South Korea.
- A3. Lee H, Sangimino M, **Li Y** et al, “Simulation-based social skills training in virtual reality (VR) reduces negative symptoms and bodily self-disturbance in schizophrenia”, *Society for Research in Psychopathology (SRP) 2023*, Saint Louis, USA.
- A4. **Li Y**, Vinet S. Q., Goodale S. E., Pourmotabbed H, Martin C. G., Morgan V. L., Englot D. J., Chang C, “Temporal variation and state dependence of EEG-fMRI correlations”, *Resting State Brain Connectivity Conference (RSBC) 2023*, Dallas, Texas, U.S.A.
- A5. **Li Y**, Vinet S. Q., Goodale S. E., Pourmotabbed H, Martin C. G., Morgan V. L., Englot D. J., Chang C, “Temporal variation and state dependence of EEG-fMRI correlations”, *Organization for Human Brain Mapping (OHBM) Annual meeting 2023*, Montreal, Canada.
- A6. Shi W, Sun J, **Li Y**, Sun C, Zheng T, Zhang Y, Wang G, Wu D, “Automated motion correction of multi-slice fetal brain MRI using a deep recursive framework”, *International Society for Magnetic Resonance in Medicine Annual Meeting 2021*, Vancouver. (Oral)
- A7. Shi W, Yan G, **Li Y**, Li H, Liu T, Zou Y, Wu D. “Fetal brain age estimation and anomaly detection using attention-based deep ensembles with uncertainty”, *International Society for Magnetic Resonance in Medicine Annual Meeting 2020*, Sydney.

## TEACHING EXPERIENCE

Vanderbilt University, undergraduate & graduate course: *Foundation of Machine Learning* (CS4262/5262), Fall 2022  
Prof. Catie Chang, Prof. Soheil Kolouri.

## ACADEMIC SERVICE

Conference reviews: NeurIPS (2024), ICLR (2024), MICCAI (2023, 2024)

## SELECTED AWARDS AND HONORS

- |   |             |
|---|-------------|
| • Top reviewers, NeurIPS 2024   | 2024        |
| • Best Poster Award, ECE Day, Vanderbilt University   | 2024        |
| • Student Conference Travel Grant, Vanderbilt University  | 2024        |
| • SPIE student travel award, SPIE Medical Imaging 2024  | 2024        |
| • Russell G. Hamilton Scholar, Vanderbilt University  | 2022        |
| • Engineering Graduate Fellowship, Vanderbilt University  | 2022        |
| • Outstanding Graduate ( <b>Top 6%</b> ), SJTU  | 2021        |
| • Legend Medical Excellence Scholarship ( <b>Top 2%</b> ), SJTU                                     | 2021        |
| • Graduate Academic Scholarship, SJTU   | 2019 – 2021 |
| • Outstanding Graduate, XJTU  | 2019        |
| • National Scholarship ( <b>Top 0.2%</b> ), Ministry of Education of the People's Republic of China | 2018        |
| • POSTECH Open-lab Scholarship, Pohang University of Science and Technology, South Korea            | 2018        |
| • University-level Outstanding Student, XJTU  | 2016 – 2018 |
| • Siyuan Scholarship, XJTU  | 2016 – 2017 |

## ADDITIONAL INFORMATION

### Research Areas:

- Time-series modeling, Multi-modality, Brain decoding, Generative AI, Computational neuroscience, Self-supervised and supervised learning, Transformer, Biomedical time-series representation learning

### Programming skills:

- Python, Pytorch, scikit-learn, Matlab, R, HTML

### Language

- English (Proficient), Mandarin (Native)
